1.	ALKOM. FHU. MGR INŻ. HENRYK SIENKIEWICZ	recycling, maintaining cleanliness and order, sanitation	alkom.pl	POLAND
2.	AGDER INNOVASJON	Agder Innovasjon AS is an innovative company with the aim of helping businesses and individuals with a need to handle both internal and external processes. The vast majority of small and medium-sized businesses do not have this expertise internally, and you will be able to maximize value creation by handling them in the most appropriate way. Agder Innovation enters as a partner or adviser in processes where you see the value of having expertise with you when it comes to communicating with public authorities, the media and other actors that require both legal expertise and communication skills. We see an increasing demand for experienced advisers at the intersection between public law, politics and community relations. Here you need lawyers with experience from public administration and politics. The combination of law, communication and political insight is very important when working with everything from changes to zoning plans and development agreements to rule changes to laws and regulations. Also internal company changes and implementation of current legislation and routines require clear and distinct communication. The understanding of intercultural relations is often make or break for businesses that want to expand their business into new geographical areas. Since 1998, we have worked to establish businesses and networks at the intersection of cultural divides, and therefore have a unique network that helps us understand the codes that need to be solved.	agderinnovasjon.no	NORWAY
